Esignature or also known as Electronic Signature is replacing the traditional written signatures and signing processes. Electronic Signatures are used in many critical business processes across all industries and thus are becoming more popular than ever before in the internet-driven business environment. After many countries passing electronic signature laws and giving equal legal validity as handwritten signatures, the trend is catching up rapidly.

CryptoESIGN is a cloud-based, word inspired, modern electronic signature software built on the principle of Self-Explanatory User Interfaces (SEUI). It creates trust and confidence in a paperless environment with a simple and intuitive user interface. Business associates can use it to improve convenience and speed.

# CryptoESIGN eSignature benefits
